

## Progress report 7

Team : Abdrakhman Nazym – 200103427

Amandolla Neila – 200103512

Categories:

Firstly in this week we did the categories and about page.

We created a section, that have a class and id called Fiction, then created a div called shop-container and another div called box, cause in previous we made a blurred box, so we just tried to use this concept, and added them to our background for a each book in categories. There we added img, gave the source (destination) where we find the image. Then added icons like stars, name in h2, price in span, and button.

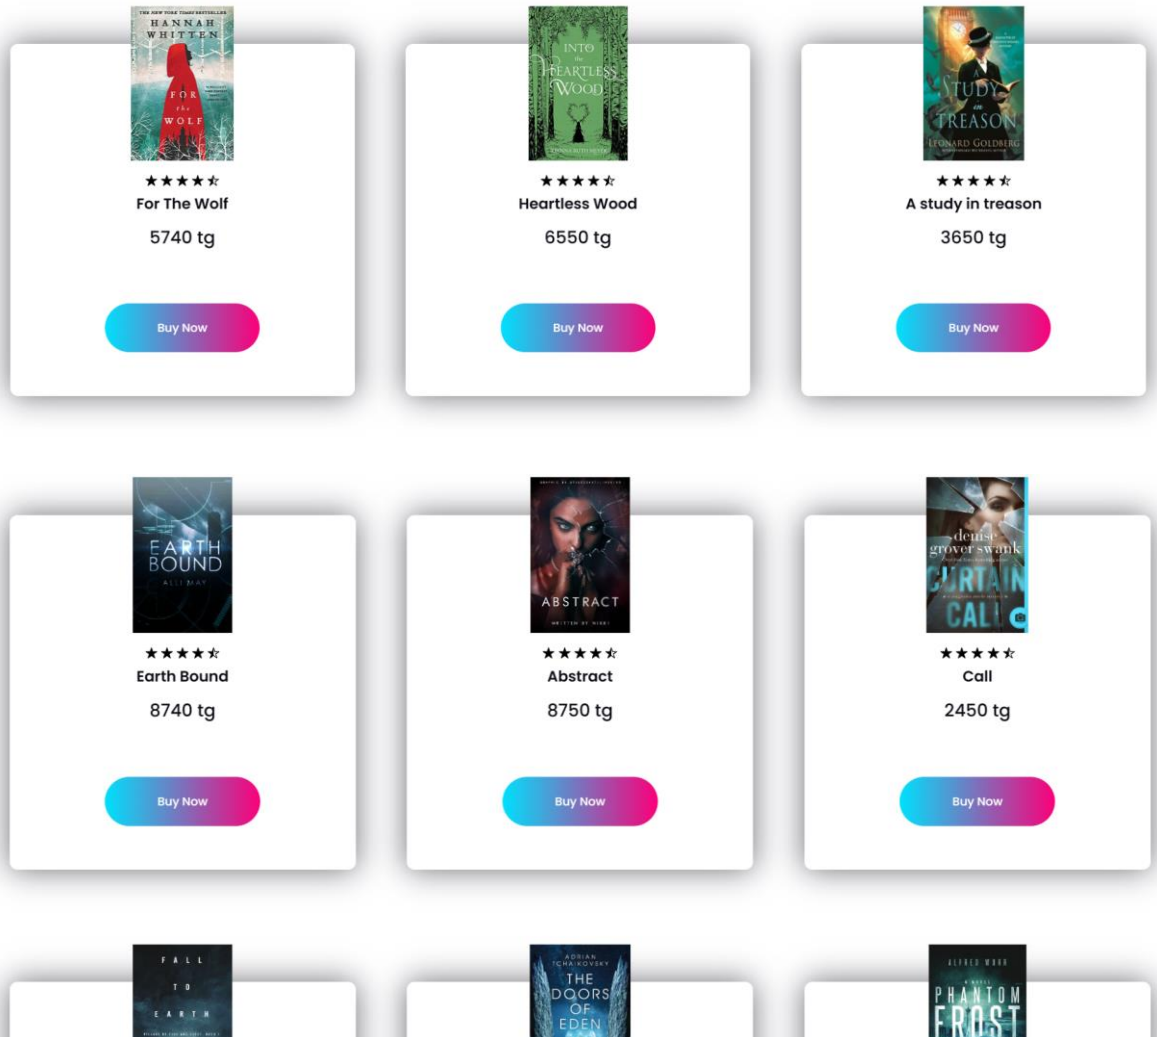

```
<section class="Fiction" id="Fiction">

  <div class="heading">
    <h1>Categories</h1>
  </div>

  <div class="shop-container">
    <div class="box">
      <div class="box-img">
        
      </div>
      <div class="stars">
        <ion-icon name="star"></ion-icon>
        <ion-icon name="star"></ion-icon>
        <ion-icon name="star"></ion-icon>
        <ion-icon name="star"></ion-icon>
        <ion-icon name="star-half"></ion-icon>
      </div>
      <h2>For The Wolf</h2>
      <span>5740 tg</span>
      <a href="#" class="btn">Buy Now</a>
    </div>

    <div class="box">
      <div class="box-img">
        
      </div>
      <div class="stars">
        <ion-icon name="star"></ion-icon>
        <ion-icon name="star"></ion-icon>
        <ion-icon name="star"></ion-icon>
      </div>
    </div>
  </div>
</section>
```

There how it looks in website.

About

There we created another section named about2, there we have heading. Div class called about-content. There we have also box and in this we have a inputs, labels for Name, Username, Message , also button.

```

<section class="about2" id="about2">

  <div class="heading">
    <h1>About</h1>
  </div>

  <div class="about-content">
    <div class="main-text">
      <h1>Contact us</h1>
      <p>You can contact us everywhere, anytime!</p>
      <label for="name">Name</label>
      <input type="text" placeholder="Name" id="name">
      <label for="username">Username</label>
      <input type="text" placeholder="Username" id="username">
      <label for="message">Message</label>
      <input type="message" placeholder="Message" id="message">

      <a href="#Fiction" class="btn1" style="vertical-align:middle ; margin-top: 20px;"><span>Contacts...</span></a>
    </div>
  </div>

```

There we created a div class named inf, to make a information in another box. It consists class ic, that have div's , and in each div we have icons, text.

```

  <div class="inf">
    <h2 style="color: ■ #ecf0f1; text-align: center;">Information</h2>
    <div class="ic">
      <div>
        <ion-icon name="mail-outline"></ion-icon>
        <span class="text">Email.gmail.com</span>
      </div>
      <div>
        <ion-icon name="storefront-outline"></ion-icon>
        <span class="text">Almaty Region</span>
      </div>
      <div>
        <ion-icon name="call-outline"></ion-icon>
        <span class="text">+747 852 963</span>
      </div>
      <div>
        <ion-icon name="time-outline"></ion-icon>
        <span class="text">9:00 - 18:00</span>
      </div>
    </div>
  </div>
</section>

```

There how it looks:
